## Shoulder Straps Measurement Form

---

Shoulder Straps are slightly adjustable however, for proper function they are custom sewn to conform to the body of a particular user. If you have multiple users with different body measurements, you will need separate straps for each user. For accuracy, have another person take measurements with a cloth tape. Tape should be snug but not tight. Do not use clothing measurements. Use a separate form for each set of straps.

Name: \_\_\_\_\_ Company: \_\_\_\_\_ Phone: \_\_\_\_\_ Email: \_\_\_\_\_

Height: \_\_\_\_\_ Weight: \_\_\_\_\_ Color (Black or White): \_\_\_\_\_

Back: \_\_\_\_\_  
Measure from C7 vertebra at  
base of neck to the point where navel  
would pass through the back.
